A dedicated frontend engineer with about 3 years of experience developing responsive and intuitive web applications. Proficient in HTML, CSS, JavaScript, TypeScript, React, and Next.js, with a strong foundation in frontend development, UI/UX design, and agile methodologies. Experienced in working closely with backend developers and participating in the full software development lifecycle, including sprint planning, code reviews, and documentation.

Professional Experience

Frontend Engineer, ACCURE Battery Intelligence  10/2023 – 05/2024

- Implemented new UI features in existing React.js applications, optimized for performance and scalability.
- Enhanced the overall design of an existing platform, leading to a 35% increase in conversion rates.
- Maintained 100% platform uptime by proactively identifying and resolving frontend issues, significantly improving user satisfaction.
- Successfully integrated frontend components with RESTful APIs in collaboration with backend developers, ensuring seamless data flow and 100% data consistency.
- Conducted code reviews and collaborated with senior developers to maintain high coding standards.

Frontend Engineer, HEYCAR  10/2021 – 09/2023

- Developed reusable UI components that reduced codebase redundancy by 40%, accelerating development cycles and improving code maintainability.
- Collaborated with designers to ensure the technical feasibility of 15+ UI/UX designs, enhancing user experience.
- Boosted test coverage by 30%, leading to early detection of bugs and reducing production issues by 20%.
